SUMMARY

MSc in AI candidate at National College of Ireland with 3 years of professional experience in quality engineering and automation testing at Cognizant Technology Solutions. Skilled in Selenium, Cypress, and CI/CD pipelines with hands-on expertise in functional, regression, and performance testing across mobile and web platforms. Experienced in Agile environments, defect tracking with Jira and TestRail, and cross-functional team collaboration. Currently exploring AI and machine learning applications, with a strong foundation in Python and SQL. Seeking a 12-week Software Engineering internship from May 2026.

EDUCATION

National College of Ireland

MSc in Artificial Intelligence

Dublin, Ireland
Jan 2026 to Present

Velammal College of Engineering and Technology

BE in Electronics and Communication Engineering | First Class Honours (1:1)

Tamil Nadu, India
Aug 2018 to May 2022

EXPERIENCE

Programmer Analyst

Cognizant Technology Solutions

Oct 2023 to Jan 2026
Kochi, India

- Performed **manual** and **automated testing** for the Paramount+ application across mobile and web platforms, covering functional, regression, and smoke testing.
- Supported automation testing using **Selenium** and **Cypress**, improving test coverage and enhancing testing efficiency across releases.
- Managed test cases, test execution, and defect tracking using **Jira** and **TestRail**, ensuring accurate documentation and effective issue resolution.
- Collaborated with developers, product managers, and QA teams in an **Agile** environment to identify and resolve critical defects ahead of release deadlines.

Programmer Analyst Trainee

Cognizant Technology Solutions

Oct 2022 to Oct 2023
Kochi, India

- Created and executed test cases to validate software functionality and ensure applications met quality standards under the guidance of senior QA engineers.
- Developed and maintained automated test scripts using **Selenium** and **Cypress** to improve test coverage and reduce manual effort.
- Identified, documented, and tracked software defects throughout the complete bug lifecycle until resolution using **Jira** and **TestRail**.
- Applied **Agile** testing methodologies and QA best practices in daily project work, contributing to sprint planning and release validation.

Quality Engineering and Assurance Intern

Cognizant Technology Solutions

Apr 2022 to Jul 2022
India

- Gained hands-on experience in **SQL** and **Selenium** through structured software testing activities and practical lab exercises.
- Developed practical skills in **HTML** and **CSS** while contributing to testing and interface validation tasks across team projects.

TECHNICAL SKILLS

- **Testing and Automation:** Selenium WebDriver, Cypress, JMeter, Manual Testing, Functional Testing, Regression Testing, Smoke Testing
- **Tools and Platforms:** Jira, TestRail, Jenkins, GitHub, CI/CD Pipelines, Agile/Scrum
- **Languages:** Java, Python, SQL, JavaScript, HTML, CSS
- **Fundamentals:** Software Testing Lifecycle, Bug Lifecycle, Test Case Design, Database Validation, REST API Testing

CERTIFICATIONS AND ACHIEVEMENTS

- **Software Testing:** Masterclass Software Testing with Jira and Agile, Selenium Web Driver with Java, Cypress Automation Testing, Types of Testing and Bug Lifecycle, Web Driver IO with JavaScript Automation.
- Developed **MindTune-OS**, an EEG-based agentic AI system using OAuth 2.0 and Groq, achieving 92.94% mental state classification accuracy with TinyML on Arduino.
- **Neuro-Symbolic XAI Pipeline**, Designed an explainable medical image diagnosis system integrating CNNs, symbolic rules, and SQLite-based prediction logging across chest & skin datasets.
- Built **Irish Culture Chat**, a React.js AI chatbot with interactive Maps API integration, delivering personalised cultural and heritage insights about Ireland | Link: <https://irish-chat.vercel.app/>

AVAILABILITY

- Allowed to work legally in Ireland with a valid visa and available for internship starting from May 2026.
